

Koray

Public-Source Research & Digital Analysis

I turn scattered public evidence into source-linked, decision-ready briefs, reports, trackers, and presentations. The emphasis is on traceability: what is confirmed, what remains uncertain, and what evidence would change the conclusion.

Capabilities & outputs

RESEARCH	Primary-source collection, multi-source verification, and explicit handling of conflicting evidence.	Evidence discipline - Capture the source and publication context. - Cross-check material claims independently. - Separate verified fact from inference. - Record uncertainty and source conflicts. - Review citations and reasoning as a final gate. AVAILABLE FOR A defined paid pilot with a written topic, audience, scope, output format, source constraints, deadline, and price.
STRUCTURE	Chronologies, actor and interest maps, policy trackers, source matrices, and scenario watchlists.	
ANALYSIS	Claim-to-source traceability, confidence labels, scenario triggers, and Python or spreadsheet analysis.	
DELIVERY	Concise briefs, full reports, source appendices, decision trackers, and presentation decks.	
QUALITY	Citation, logic, consistency, and unsupported-claim review before final delivery.	

Research workflow

01 Scope Question, audience, source boundaries	02 Verify Primary evidence and cross-checks	03 Synthesize Findings, confidence, scenarios	04 Review Citation, logic, consistency QA
---	--	--	--

AI-ASSISTED METHOD	The workflow is AI-assisted and multi-model. Parallel agents can collect, challenge, structure, and check evidence; Koray remains responsible for the agreed scope, lawful source boundaries, and final delivery.
--------------------	---

ORIGINAL SAMPLE	This document is an original method sample, not paid client work or proof of prior outcomes. It demonstrates evidence-first structure, confidence labels, claim boundaries, source traceability, and final citation and logic QA.
-----------------	---

BOUNDARIES	No claim is made to insider access, exclusive sources, classified or restricted data, newsroom or think-tank employment, academic credentials, publications, or client outcomes. Work uses lawful public sources or client-supplied material provided with permission.
